

Fun Friday

Let's Get Rocking!

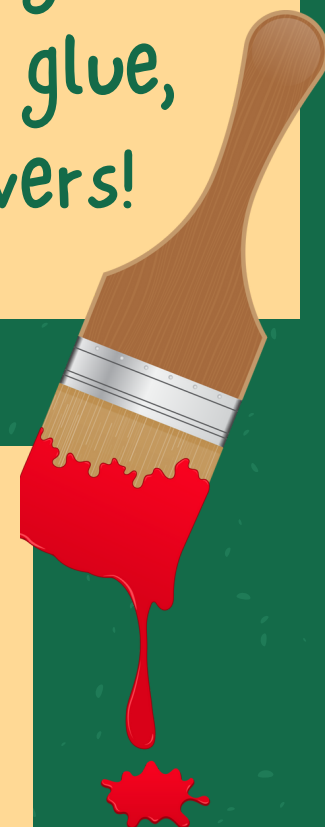

Practice creativity,
decision-making, and
fine motor skills with
this fun activity!

Setting Up

Gather washable paint, modge podge, brushes, water, paper plates, paint, glue, googly eyes, smocks, and table covers!

Encourage children to bring rocks from home or set aside a time for the entire class to go on an outside adventure to search for rocks!

Create!

- Prepare the craft area and encourage children to start painting
- talk about different colors they can use on their rock
- Once rocks are dry and children are done painting, bring out items for them to decorate (googly eyes, sequins, pipecleaners, etc.)
- Once everyone is finished, have children talk about their rock and its features

Reflection and Benefits

talk about the rocks each
child chose and where they
may have come from!

this activity allows children to
practice their fine motor skills,
and allows them to make their
own individualized creation!

Share with us!

take photos of the
final painted rocks
and share!

What part of this was the kids'
favorite? Picking out the rock
or making a fun creation?
